POPS SPRAY BOTTLE/MOP BUCKET FILL METERING TIP USAGE CHART

Water Pressure: 40PSI

Tested according to water (viscosity=0)

Metering Tip Selection:

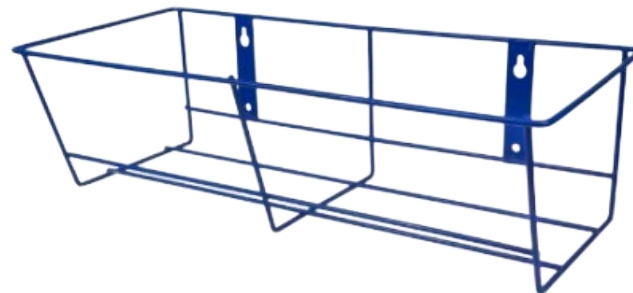

The final concentration of the dispensed solution is related to both the size of the metering tip opening and the viscosity of the liquid being siphoned. For water-thin products, the chart below can be used as a guideline. If product is notice ably thicker than water, actual dilution achieved can only be ascertained by measurement. Dilution can vary with water temperature and pressure.
